

**IN THE SPECIFICATION**

Please enter the following sentences in the Detailed Description at the end of paragraph [0024], *i.e.*, the paragraph beginning with “In addition to the at least one microfluidic chamber, as described above, the subject devices further include a means for actuating the pressure producing means...”:

As shown in FIG. 3, in one embodiment of the invention microfluidic device 10 further includes a control 134 that serves as means for actuating the pressure producing means to produce a pressurized fluid source communicating with, for example, nozzle(s) 22. Control 134 may be programmed by a person of ordinary skill in the art to provide preferred delivery pressures, velocities, and frequencies as described herein below.

Please enter the following paragraph in the Brief Description of Drawings after paragraph [0013], *i.e.*, the paragraph beginning with “FIGS. 2A and 2B provide a schematic view of a second embodiment...”:

FIG. 3 provides a schematic view of a device including a control according to an embodiment of the present invention.
